Maraton

HYDRAULIC HOSES

Vision

- We are determined to make MARATON a leading global brand for hydraulic hoses.

Mission

- We are determined to develop the brand into an integrated hydraulic hose solution supply and service platform offering comprehensive hydraulic hose solutions to our worldwide customers.

ISO 1436:2009**

Internal Hose	Synthetic rubber, extruded whole without joints, of uniform thickness.
Covering	Anti-abrasive synthetic rubber, resistant to oils, fuels and atmospheric conditions.
Reinforcement	1 steel wire braid.
Working Pressure	40 Bar - 250 Bar / 580 Psi - 3625 Psi
Impulse Times	≥ 150,000 Times
Operating Temperature	From -40 to +100°C (intermittent 120°C), from -40 to +70°C for water based fluids, from 0 to +70°C for hot air.  Low temperature resistance: From -50 to +100°C (intermittent -55°C or +120°C) Prolonged operation at extreme temperatures will reduce hoses life.
Recommended Fluid	Mineral and biological oils, glycol-water based, water, lubricants.
Fittings Type	1. FERRULE: No-skive Type DPF2T ; 2. Insert: DPX1XX (X: Can choose)
Flame Resistance	U.S MSHA Approval & CHN MA Approval

Internal Hose	Synthetic rubber, extruded whole without joints, of uniform thickness.
Covering	Anti-abrasive synthetic rubber, resistant to oils, fuels and atmospheric conditions.
Reinforcement	1 steel wire braid.
Working Pressure	40 Bar - 250 Bar / 580 Psi - 3625 Psi
Impulse Times	≥ 150,000 Times
Operating Temperature	From -40 to +100°C (intermittent 120°C), from -40 to +70°C for water based fluids, from 0 to +70°C for hot air. Prolonged operation at extreme temperatures will reduce hoses life.
Recommended	Mineral and biological oils, glycol-water based, water, lubricants.
Fluid Fittings Type	1. FERRULE: No-skive Type DPF2T ; 2. Insert: DPX1XX (X: Can choose)
Flame Resistance	U.S MSHA Approval & CHN MA Approval

SAE 100R4

Internal Hose	Synthetic rubber with oil resistant.
Covering	Anti-abrasive synthetic rubber, resistant to oils and atmospheric conditions.
Reinforcement	Braided textile fibers with a suitable spiral of body steel wire.
Working Pressure	2.5 Bar - 21 Bar / 40 Psi - 305 Psi
Operating Temperature	From -40 to +100°C. Prolonged operation at extreme temperatures will reduce hoses life.
Recommended Fluid	Low pressure and vacuum applications with petroleum base hydraulic fluids.

PILOT HOSE

Internal Hose	Synthetic rubber, extruded whole without joints, of uniform thickness.
Covering	Anti-abrasive synthetic rubber, resistant to oils, fuels and atmospheric conditions.
Reinforcement	1 steel wire braid.
Working Pressure	125 Bar / 1813 Psi
Impulse Times	≥ 150,000 Times
Operating Temperature	From -40 to +100°C (intermittent 120°C), from -40 to +70°C for water based fluids, from 0 to +70°C for hot air. Prolonged operation at extreme temperatures will reduce hoses life.
Recommended Fluid	Suitable for medium pressure and return lines for use with petroleum, synthetic or water based fluids in hydraulic system suitable for agricultural, construction & material handling equipment and machineries system.
Fittings Type	1. FERRULE: No-skive Type DPF2T ; 2. Insert: DPX1XX (X: Can choose)
Flame Resistance	Specially designed for servo control pilot lines 125 bar and requires very high flexibility superior finish on cover surface to have gliding effect on the other lines that are clustered together and very minimal outer cover damages.

FUEL DISPENSING HOSE-Type 1 EN1360 1W STEEL WIRE

Internal Hose	Synthetic rubber resistant to petrol and diesel fuel, extruded whole without joints, of uniform thickness. Anti-static electricity: R < 1MΩ
Covering	Anti-abrasive synthetic rubber, resistant to oils, fuels and atmospheric conditions. Anti-static electricity: R < 1MΩ
Reinforcement	1 steel wire braid.
Working Pressure	20 Bar / 290 Psi
Description	Fuel hose is a problem under actual working conditions, whether it is low temperature or continuous high temperature or fluid compatibility.
	The hose can not adapt to high temperature or low temperature, and the life will be greatly reduced.
	The glue and glue inside the hose can not adapt to the corrosion of fuel oil, and the life will be greatly reduced. From the perspective of R & D, we enhance the heat and low temperature performance of hoses. And hose production process according to EN1360 and UL standards, the use of anti-static, fuel oil, high-intensity ultraviolet resistance process structure. This greatly extends the service life of fuel tubes.
Operating Temperature	From -40 to +100°C Prolonged operation at extreme temperatures will reduce hoses life.
Recommended Fluid	Petrol and diesel fuel dispensing lines of pressure 290 Psi.
Fittings Type	1. FERRULE: No-skive Type DPF2T ; 2. Insert: DPX1XX (X: Can choose)

SAE 100R12
ISO 3862 R12
EN856 R12

Internal Hose	Synthetic rubber, extruded whole without joints, of uniform thickness.
Covering	Anti-abrasive synthetic rubber, resistant to oils, fuels and atmospheric conditions.
Reinforcement	4 steel wire spirals.
Working Pressure	172 Bar - 276 Bar / 2494 Psi - 4002 Psi
Impulse Times	≥ 500,000 Times
Operating Temperature	From -40 to +120°C (intermittent 125°C), from -40 to +70°C for water based fluids, from 0 to +70°C for hot air. Prolonged operation at extreme temperatures will reduce hoses life.
Recommended Fluid	Hydraulic fluids petroleum based (mineral oils), glycol-water based, water, lubricants.
Fittings Type	1. FERRULE: No-skive Type DPF4T ; 2. Insert: DPX4XX (X: Can choose)
Flame Resistance	U.S MSHA Approval & CHN MA Approval
